

## CERTIFICATE OF CONFORMITY

For Messrs: Hoffmann Mineral GmbH & Co. KG, Neuburg (Donau)

Product: Sillitin (Mixture of V85, N82, N85, N87, Z86, Z89)

The above mentioned product was examined by us according to the regulations of the Decree on the Use of Additives as well as according to the BfR-Recommendation LII (see Report 2008/11/199).

The product is in compliance with the rules of the

Regulation (EC) No 1935/2004 of the European Parliament and of the Council of 27. October 2004 on materials and articles intended to come into contact with food and repealing Directives 80/590/EEC and 89/109/EEC, Official Journal of the European Union No. L 338/4 of 27.10.2004 and

Foodstuffs, Consumer Goods and Animal Feed Code (Foodstuffs and Animal Feed Code - LFGB) of 1. September 2005, published on 6 September 2005, state of 26.2.2008, §§ 30 and 31,

and is approved according to the

Decree on the Demands regarding Additives and the Use of Additives for Technological Purposes (Decree on the Use of Additives - ZVerkV) of 29 January 1998, issued on 5 February 1998, last modification of 30.01.2008,

German Recommendation LIII for the health-related evaluation of plastic materials according to the Foodstuffs and Consumer Goods Act, 167th memorandum, Bundesgesundheitsblatt 27, 289 (1984), including the 206th memorandum, Bundesgesundheitsblatt 46, 444 (2003), state of 1.1.2003,

German Recommendation XXXVI for the health-related evaluation of plastic materials according to the Foodstuffs and Consumer Goods Act, 34th memorandum, Bundesgesundheitsblatt 10, 14 (1967), including the 208th memorandum, Bundesgesundheitsblatt 48, 703 (2005), state of 1.6.2007 and

KTW-memorandum, Bundesgesundheitsblatt 28, Part 1.3.13.2.1 371 (1995), including the 6<sup>th</sup> KTW-memorandum, Bundesgesundheitsblatt 30, 178 (1987), state of March 1990.

Thus, the product may be used safely as fillers for plastics, rubber, cellophane, paper, board, plastics dispersions, lacquers and colourants used in the food sector and employed as food additives.

The consumer goods manufactured from the product may stand in direct contact with dry, moist and fatty foodstuffs and may come into contact with the human skin and mucous membranes, as far as the fillers are concerned.
