

Ian Christie Galanthus Listing 2018

New Introductions and New Offerings

The Castle Series

Castle Green Dragon

The rare and stunning Castle virescent, seldom offered.

Brechin Ian

New introduction with a dark green apical mark, with a lighter green sinus marking.

The Yellows

Golden Promise

Very rare, much sought after Scottish yellow. Singled out by Val Bourne as one of the ‘elusive gold’ snowdrops in her Daily Telegraph article.

Yellow Dangly

Seedling from Italy, a beautiful new yellow snowdrop with a long pedicel. Some doubt over whether this is a hybrid or a yellow Reginae-olgae. Join the mystery!

Green Mark on Outers

Ladies Fingers

A lovely green-tipped nivalis with long slender ovary and flower.

Hedgehog Spiky Green Tip

A new quirky nivalis double with spiky outers and lovely green tips.

Virescents

Green Mile

Grown on at my nursery and hardened under the Scottish climate, performs very well here.

Poculiform

First Lady

A stunning poculiform, the best so far in my view. First time offering.

Poculi-Perfect

First time offering of a beautiful nivalis poculiform.

Christie Specials

Grant Colvin

New plicatus with green inverted V inner joining a green stripe to the base.

Green Moon

A compact nivalis with a delightful crescent moon shaped marking on the inner.

Harley Milne

Named in memory of a President of the SRGC. Superb coffee-cup shaped flower with lovely mid-green apical and sinus marking.

Plus a full range of snowdrops for the beginner or somebody wishing to experiment with new types or coloured drops and established favourites such as Ronald Mackenzie, Elizabeth Harrison and Rosemary Burnham.
